

# Read & Publish

Read & Publish supports open access publishing whilst ensuring we are in the best position to sustainably shape the future of publishing for the benefit of our community.

Read & Publish lets corresponding authors at institutions publish gold OA in our hybrid journals and provides perpetual access rights to our entire journal portfolio.

## The benefits

Corresponding authors

**Publishing OA maximises the visibility of research**

Ability to publish under a CC-BY or a CC-BY NC licence

No extra costs in publishing hybrid OA as these are covered by the agreement

Institutions

**OA can be the default choice for authors**

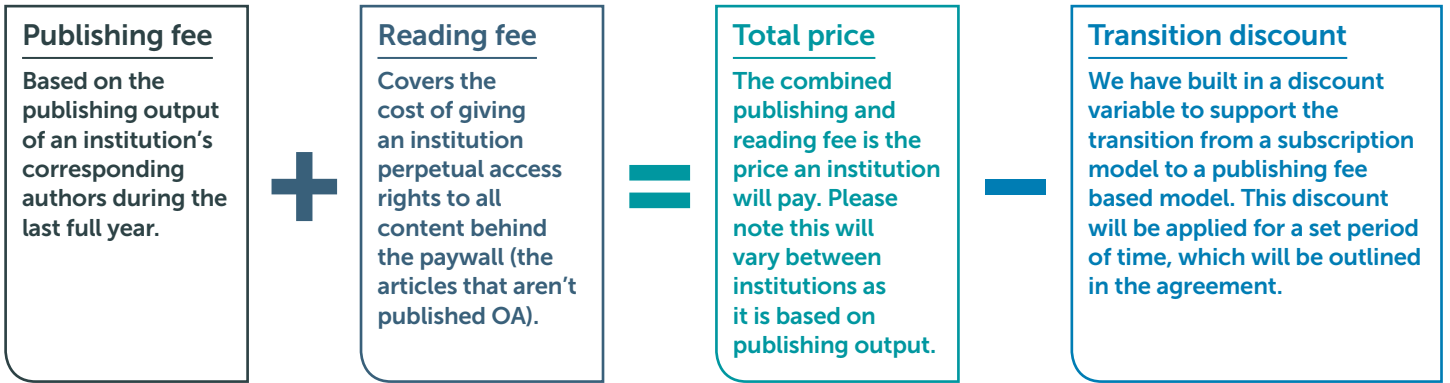

Reduced administrative burden through the automatic identification of corresponding authors

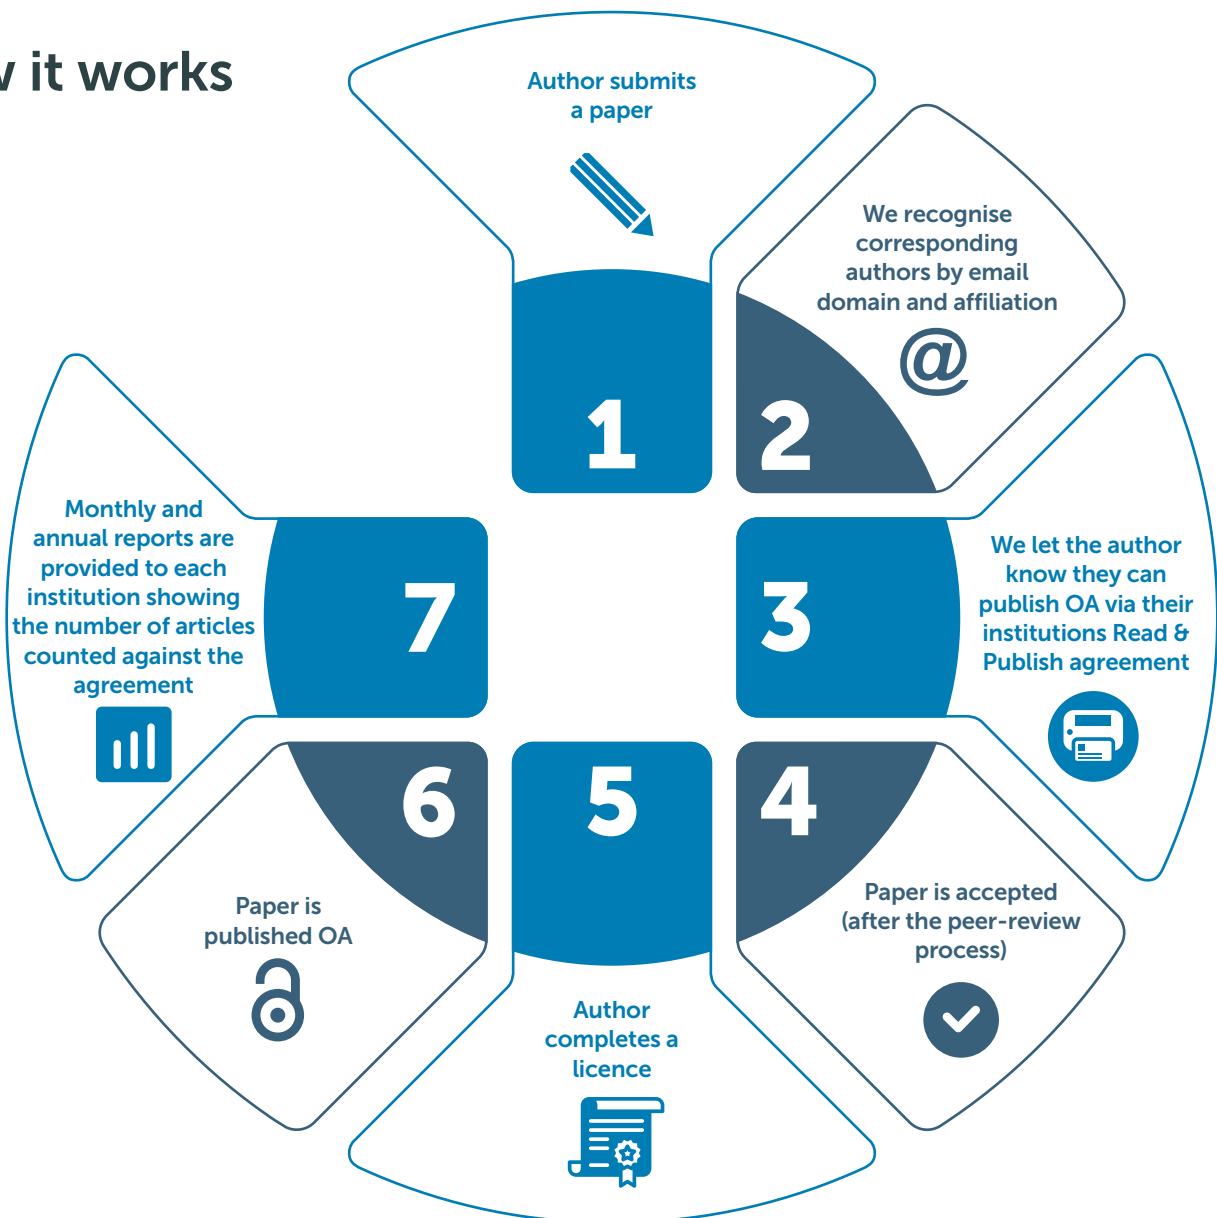

Perpetual access rights to our entire journal portfolio

# Read & Publish pricing

## How it works

## Why Read & Publish

The rise in OA publishing means that the needs of our community are changing. We are committed to ensuring we share the best ideas in the way that our community wants to access them.

Read & Publish supports OA publishing whilst ensuring we offer traditional subscription models for when open access isn't a priority.
